concluiu com sucesso o Programa de cursos integrados on-line (sem créditos)

Google Workspace Administration

The G Suite Administration Specialization has been developed to help administrators master the foundations of managing and establishing G Suite best practices for their organization. The courses cover account setup and provisioning and management of users, groups and resources. You will also explore core services such as Gmail, Calendar, and Drive & Docs and learn how to configure them. G Suite Security covers best practices to protect your users and data. You will explore user security, application security and Single Sign On (SSO) options. Finally you will learn how to manage mail with G Suite. You will configure email compliance and learn how to protect your organization from spam, spoofing, phishing and malware attacks.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
